Photosynthesis Research **28**: 155–156, 1991.

Contents Volume 28 1991

Volume 28 No. 1 April 1991

Regular papers
Peng, S., Krieg, D.R. and Girma, F.S.: Leaf photosynthetic rate is correlated with biomass and grain production in grain sorghum lines 1
Santakumari, M. and Berkowitz, G.A.: Chloroplast volume: cell water potential relationships and acclimation of photosynthesis to leaf water deficits 9
Bolaños, J.A. and Hsiao, T.C.: Photosynthetic and respiratory characterization of field grown tomato 21
Technical communications
Meunier, P.C. and Popovic, R.: The time for oxygen release in photosynthesis: reconciliation of flash polarography with other measurement techniques 33
Sharkey, T.D., Savitch, L.V. and Butz, N.D.: Photometric method for routine determination of k_{cat} and carbamylation of rubisco 41
Announcement 49

Volume 28 No. 2 May 1991

Regular papers
Liu, B.-L., Yang, L.-H. and Hoff, A.J.: On the depletion and reconstitution of both Q_A and metal in reaction centers of the photosynthetic bacterium *Rb. sphaeroides* R-26 51
Chain, R.K. and Malkin, R.: The chloroplast cytochrome b_6f complex can exist in monomeric and dimeric states 59
Spampinato, C.P., Paneth, P., O'Leary, M.H. and Andreo, C.S.: Analogues of $NADP^+$ as inhibitors and coenzymes for $NADP^+$ malic enzyme from maize leaves 69
Otte, S.C.M., van der Heiden, J.C., Pfennig, N. and Amesz, J.: A comparative study of the optical characteristics of intact cells of photosynthetic green sulfur bacteria containing bacteriochlorophyll *c*, *d* or *e* 77
Technical communication
Christensen, H.E.M., Conrad, L.S. and Ulstrup, J.: Isolation and purification of plastocyanin from spinach stored frozen using hydrophobic interaction and ion-exchange chromatography 89

Volume 28 No. 3 June 1991

Obituary 95
Regular papers
Rawat, A.S. and Purohit, A.N.: CO_2 and water vapour exchange in four alpine herbs at two altitudes and under varying light and temperature conditions 99
Klingler, H., Frosch, S. and Wagner, E.: *In vitro* effects of monoterpenes on chloroplast membranes 109
Hansen, U.-P., Dau, H., Brüning, B., Fritsch, T. and Moldaenke, C.: Linear analysis applied to the comparative study of the I-D-P phase of chlorophyll fluorescence as induced by actinic PS-II light, PS-I light and changes in CO_2-concentration 119

Bittner, Th., Voigt, J., Kehrberg, G., Eckert, H.-J. and Renger, G.: Evidence of excited state absorption in PS II membrane fragments 131
Ravenel, J. and Peltier, G.: Inhibition of chlororespiration by myxothiazol and antimycin A in *Chlamydomonas reinhardtii* 141
Rapid communication
van Leeuwen, P.J., Nieveen, M.C., van de Meent, E.J., Dekker, J.P. and van Gorkom, H.J.: Rapid and simple isolation of pure photosystem II core and reaction center particles from spinach 149
